### Word of the day

#### Sustainability

Sustainability is economic development that is not at the cost of the needs of future generations. It aims at preservation of natural resources and maintaining ecological balance. It takes into account the needs of future generations. The United Nations states that sustainable consumption and production aims at "doing more and better with less." By choosing a sustainable lifestyle, we can reduce our environmental footprint and help preserve the environment for future generations.

### What is a layup?

The layup is among the most basic shots in basketball. It is a two-point attempt wherein the person attempting the shot first leaps from below. They then lay the ball up near the basket and using one hand bounce it off the backboard and into the basket. The next time you watch a game of basketball, try to spot the layups.

Question: How many points does a player get for a successful layup?
